Main Topic : Arcade Games

Sub Topic : Two Player Arcade Games

Arcade games are coin-operated amusement machines seen in restaurants, video arcades, pubs, movie theatres, supermarkets, shopping malls and other family activity centers. Redemption games, video games and pinball machines are common arcade games. In two player arcade games, two persons can play a game at the same time. Here, players either fight against each other or team up to attain a common objective.

The first recognized arcade games were the early 20th century amusement park games such as shooting galleries, ball toss games and coin-operated mechanical fortune tellers. The first coin-operated pinball machines were made in the 1930s. All those machines were single person operated. By the mid-1980s, known as the golden age of arcade games, two player arcade games such as Street Fighter, Mortal Kombat and Fatal Fury became a reality.

Two player arcade games have extremely short levels, iconic characters, simple controllers, and increasing levels of complexity. Compared to most console games, these are built as short adrenaline-driven thrillers. Any game on a cabinet or a PC can be called an arcade game if it possesses the above properties.

An arcade game's hardware is installed in an arcade machine or cabin. The shape and size of the machine varies according to the games it is built for. Common type cabinets include upright, cocktail/table, sit-down, cockpit/environmental and countertop. Two player games housed in a cocktail type are usually alternating, with each player taking turns in the game. Here, the monitor reverses its direction for each player.

The major parts of an arcade machine are a monitor, a marquee that displays the game's title, a control panel and coin slots. The controls are normally a joystick, action buttons and player buttons or start buttons. Some machines replace joysticks with trackballs. There are games using double joysticks instead of action buttons.

The basic components of almost all two player arcade machines are solid state electronics and integrated circuits. Coin-operated arcade video games normally feature multiple CPUs, added sound, graphics chips and/or boards and the latest computer graphics display. The interactivity of these games makes the players feel more kinesthetically connected to the game itself.

Main Topic : Art Schools

Sub Topic : Fine Art Schools

Fine art schools aim at developing the creative and technical skills in students. These

schools will give a basic and solid foundation for careers associated with fine arts. They help the students practice independently with confidence. Some of these schools offer both daytime and evening classes. Fine art schools offer classes in the fields of ceramics, computer arts, drawing, film and animation, graphic design, metals, painting, papermaking, photography, printmaking, sculpture and video. In these fields classifications and subdivisions are allotted according to each course.

A good selection of fine art schools throughout the U.S. offer undergraduate and graduate programs in fine arts. Many of these schools rank high in visual arts education and have internationally recognized faculty. The programs offered concentrate on art education, art history and museum studies. Music, dance and theatre schools offer ideal art education for students interested in these areas.

Every field of study demands considerable creativity and skill on the part of the student. To consider some of the courses offered, the ceramics section teaches the use of clay in a creative and expressive manner. Film and animation comprises a wide range of courses which build critical, conceptual, and technical skills in production and post-production stages. Graphic designs curriculum focuses on how text and image arts are used for visual communication. Courses with processes such as sawing, piercing, riveting, texturing, silver soldering, bezel setting and simple casting are taught in Metals section. Painting courses teach skills, procedures and techniques associated with painting. Papermaking courses teach the two and three dimensional uses of pulp.

Fine art schools provide easy access to training materials and equipment and some of the schools give financial aid to those who qualify. Most of the schools have professional employment services as well. Online programs awarding bachelor's, master's and associate degrees are provided by fine art schools.

Students qualifying from fine art schools can opt for exciting careers such as gallery painter, printmaker, sculptor, art consultant, art administrator, portrait artist, muralist, gallery owner, museum curator, art critic, art educator, and prototype designer. Options are open in the film industry also in the capacities of art director, visual effects artist, and background painter.

Main Topic : Las Vegas Casinos

Sub Topic : Card Games at Las Vegas Casinos

Las Vegas casinos are famous for gambling and card games. The origin of card games dates back to the 10th century in Central Asia. Card games became popular in America during the 19th century. And today, card games enjoy tremendous

popularity in Las Vegas casinos.

The different types of card games at Las Vegas casinos include trick taking games, rummy style games, gambling card games, solitaire or patience games, shedding games, accumulating games, collectible card games, multi-genre games, fictional card games, poker and video poker. The type of game to be selected is decided according to the number of players as well as their interest. Even though money plays a big role in playing cards, the ultimate aim of card games is just fun.

Regarding the many games, video poker is very common in Las Vegas casinos. Many online card games are also gaining popularity these days. The card games at Las Vegas casinos can be accessed via Internet. The bet ranges and pot sizes vary according to the websites. Free online card games are also available, which can be used to increase the skills of a player. There are several websites providing tutorials. At times, some versions of video poker are available free so that a player can practice them without paying a cent. These versions are developed by manufacturers who build the slot and video poker machines for Las Vegas casinos. Extreme care should be taken while playing card games with gambling sites as there are many illegal sites offering this game. In America, one should obtain a license to start a website to run an online gambling business.

Main Topic : Las Vegas Shows

Sub Topic : Downtown Las Vegas Shows

Downtown Las Vegas shows are light and sound shows held at night downtown Las Vegas. This light shows start at dusk and are conducted every hour till late at night. Many casinos offer mini shows and musical performances free of cost. These free shows are intended to attract more people to the sparse downtown halls.

The main part of downtown Las Vegas is Fremont Street - a pedestrian mall. You can view magnificent light shows under a barrel vault canopy every hour all through the evening. The arched canopy is almost as long as five football fields. The bottom of the canopy is decorated with LED displays. The ceiling consists of more than 2 million lights. Video clips run are supported by music through a state-of-the-art sound system.

You can have the Fremont Street Experience (FSE) in the 5 westernmost blocks of Fremont Street as well as portions of adjacent streets. FSE is owned and operated by a group of downtown hotel and casino companies. The show that begins at 7:00 pm has eight different parts that are cycled until midnight. Each show lasts for six minutes. The show starts by turning off the lights on all buildings under the canopy. These light shows, taking place 30 m above the street, dazzle all pedestrians beneath.

During the interval when light shows are not shown, music with concert quality sound is played. There are even street performers with live musical and other performing shows to arouse the crowd. All through the show time, Fremont Street is closed to vehicles.

A downtown Las Vegas show is a unique Vegas experience. This elaborate music and light show is open to all pedestrians absolutely free. The place is a family friendly area where tourists flock in large numbers.
